Fish Protein Recovery Process Controller

Lunar FPR Limited is based at Peterhead, and we are looking for a hardworking and reliable **Plant Process Controller** to work at our Fish Protein Recovery Plant.

The successful candidate will be assisting with the process product operation.

Primary responsibilities:

- Operating and monitoring the Plant Scada control system
- Regular product sampling and testing and recording the results onto the daily shift form
- Responsible to make necessary adjustments to ensure good product quality.
- Responsible for Plant start-up / shut down in coordination with another operator.
- Cleaning
- Assisting with various tasks, in other areas
- Assisting inventory parts and materials

Full training will be given.
The job can be physically demanding (climb stairs and walk throughout the shift).

Skills required:

- Good timekeeping is essential for this role
- Pleasant and professional manner in dealing with co-workers, supervisors, employees and outside agencies is essential
- Good team player and ability to work well in a multicultural environment
- Good communication skills (reading, speaking and writing)
- Ability to follow and carry out instructions given
- Forklift experience and vehicle driving licence would be an advantage.

Schedule:

It is a full-time, permanent position, shift work position with overtime available (can be up to 12 working hours per day during season).
Shift work (Backshift and Nightshift alternating-open to discuss fixed shift).
Back Shift: Monday to Friday (1500-2330). Night Shift: Monday to Friday (2300-0730).
During season start 2400 on Sunday. Saturday work will be required during busy period.

Good rate of pay plus shift allowance.

Please note the vacancy will be closed when the successful candidate has been identified.
